TECHNICAL SKILLS

Ruby on Rails, JavaScript, jQuery, React, Redux, SQL, Git, HTML, CSS3, HL7, TDD, RSpec, Agile

PROFESSIONAL EXPERIENCE

Sema4 • New York, NY

Software Engineer

Jan 2018 - Present

- Ensured rapid client scalability (1 IVF clinic to 30+ clinics) by refactoring code, managing team resources, implementing RSpec tests, and architecting requested features
- Standardized Google Cloud Pub/Sub event consumption to more efficiently communicate with internal REST APIs
- Normalized JSON to Rails conversion process by creating DRY objects and leveraging class inheritance to allow for varying levels of specificity across products
- Documented complicated workflows with Confluence pages and OmniGraffle flowcharts
- Created a junior developer hiring strategy in order to effectively find, interview, and onboard motivated developers from various bootcamps and CS programs

Junior Software Engineer

May 2017 - Jan 2018

- Built seamless front-end experiences with HTML, SCSS, Bootstrap, and jQuery
- Spearheaded project to convert Rails database information into HL7 for lab transmission
- Standardized product launch process by organizing test cases, tracking developer involvement, and leading regression testing for three different projects
- Played an integral role in establishing company culture by interviewing candidates, personally onboarding 15+ engineers, and contributing heavily to iterative Agile processes

VICE News • Indonesia (Remote) - *Transcription Specialist*

May 2016 - Dec 2016
